Bromopride

Bromopride (CAS-RN 4093-35-0) is used to treat nausea and vomiting caused by any factor, including postoperative cases (PONV), gastroesophageal reflux disease (GERD/GORD), as well as preparation for radiographic and endoscopy studies of the gastrointestinal tract. Bromopride is a substituted benzamide with prokinetic characteristics similar to those of Metoclopramide.

Main Therapeutic Application

ANTIEMETIC
